EDUCATION

California State University, Los Angeles
Bachelor of Science in Computer Science *May 2025*

EXPERIENCE

Game Tester Jul 2025–Present
Good Gamer Group *Freelance / Hybrid*

- Test unreleased games for functionality, performance, usability, and overall player experience.
- Reproduce gameplay and technical defects and document clear reproduction steps, expected behavior, actual behavior, and player impact.
- Organize detailed testing observations to support developer investigation, diagnosis, and prioritization of reported issues.
- Evaluate gameplay behavior and usability from both technical and player perspectives.

Instructor & Coach 2026–Present
Ideal Martial Arts *San Gabriel, CA*

- Lead students of varied ages and skill levels through structured instruction while communicating clear feedback and expectations.

Instructor & Coach 2016–2026
Ultimate Taekwondo Academy *Burbank, CA*

- Coached students through tournament and exam preparation while communicating performance feedback, progress, and expectations.

PROJECTS

Taekwondo Fighting Game | Unity, C# | Solo Developer | 2024–Present

- Built and tested a 3D combat prototype featuring combo mechanics, animation blending, camera control, physics, and AI-driven behavior.
- Tested movement, collisions, combat behavior, camera interactions, and gameplay systems throughout development.
- Documented movement, collision, and camera issues during iteration and managed project versions with Git and Plastic SCM.

Ultimate Taekwondo Academy Website | PHP, MySQL, HTML, CSS, JavaScript | 2026 | utkda.com

- Built and launched a mobile-responsive business website with program, schedule, gallery, event, and contact functionality.
- Developed password-protected administrative tools and deployed the MySQL-backed application through GoDaddy and cPanel.
- Tested navigation, forms, responsiveness, and compatibility across mobile devices and browsers.
- Supported hosting migration, deployment, and troubleshooting after launch.

TECHNICAL SKILLS

QA & Testing: Manual Testing, Functional Testing, Bug Reporting, Defect Reproduction, Expected vs. Actual Results, Usability Testing, Issue Documentation, Mobile Testing, Cross-Browser Testing

Development: Unity, C#, PHP, MySQL, JavaScript, SQL, HTML, CSS

Tools & Systems: Git, Visual Studio, Plastic SCM, cPanel, Windows, Unreal Engine 5
